## Manufacturers Motorized Screen, Vinyl Panel and Hurricane Roll Shutter Checklist

Warranty: Warranties are important. Make sure you get the best possible warranty. Screen America offers 7 years on the motor AND remote control, 10 years on the mesh material (except 18x14) and a limited lifetime warranty on aluminum components (bottom cross bar, tracks, housing, roll drum, slats).

Material strength and durability: Make sure you are getting the strongest most durable products. All Screen America products are made with 6063-T6 high strength aluminum.

Industry experience: Make sure the manufacturer that you are working with has the experience to custom build a lasting solution for your specific needs. Screen America has been custom manufacturing motorized screens vinyl panels and hurricane roll shutters to fit just about any opening for over 30 years.

Permitting: motorized Screen and vinyl panels DO NOT require permitting. However, most municipalities DO require permits for hurricane shutters of any kind. If you are a homeowner, you can pull your own permits. Make sure the manufacturer you are working with can provide you with the documents and information needed to complete this process.

v

Features and technology: Make sure the manufacturer you are working with can provide you with the motor options and other tech to meet your needs.

- Manual override, manual hand crank, and spring assist options that allow you to operate your shutter or screen without the need for electricity.
- Obstacle detection to prevent damaging your system in the event of an object stopping it from reaching the ground.
- Garage door or doorbell style buttons to operate your screen, shutter, or vinyl panel in addition to remote control.
- Home automation smart hub that can integrate with Siri, Alexa, and Google voice. And a smart phone app to operate your Screen America products from anywhere.
- Wind and light sensor that will raise or lower your Screen America product depending on your requirements.
- Numeric keypad entry.

Options, Options, Options: Make sure the manufacturer that you are working with can offer you just the right mix of color, shade and airflow to meet all your requirements. Screen America offers:

- Three grades of mesh material; Insect mesh for bug protection and maximum airflow, Shade mesh for protection from the sun and good airflow, Privacy mesh for maximum privacy and minimum airflow and Vinyl panels for full light and near zero airflow (.2 mil marine grade vinyl).
- Twenty-four different colors and styles of mesh/vinyl material; 9 Insect, 7 Shade, 6 Privacy, 2 Vinyl (clear and tinted).
- Four different color schemes for motorized screens, vinyl panels and hurricane roll shutters.
- Three operator options; Motorized, spring assist and manual hand crank.
- Two different hurricane roll shutter styles; Single wall roll shutter, Double wall vented roll shutter.
